Si suponemos $n \geq m$ la matriz M se puede expresar matriciamente como

$$\begin{array}{c} \underline{x}_1 \\ \vdots \\ \underline{x}_m \\ \vdots \\ \underline{x}_n \end{array} \begin{pmatrix} x_{11} & \ldots & x_{1m} \\ \vdots & \ddots & \vdots \\ x_{n1} & \ldots & x_{mm} \\ \vdots & \ddots & \vdots \\ x_{n1} & \ldots & x_{nm} \end{pmatrix} \xrightarrow{M} \begin{array}{c} \underline{x}'_1 \\ \vdots \\ \underline{x}'_m \end{array} \begin{pmatrix} x_{11} & \ldots & x_{1m} & x_{m+1,1} & \ldots & x_{n,1} \\ \vdots & \ddots & \vdots & \vdots & \ddots & \vdots \\ x_{m1} & \ldots & x_{mm} & x_{m+1,m} & \ldots & x_{nm} \end{pmatrix}$$
